PROJECTS

FlyHigh

FLYHIGH is Online Flight Booking Website.In this website we have trip ideas option which is very useful for all about different trips with low cost and everyone can book their flight tickets online. From this I learnt how to design a website using JSP and Servlets

Renter and Rentee

Renter and Rentee is an online Room rental system,in which everyone can book their rooms online. The technology used to build this web application is Django framework. From this I learnt how to design a web application using Django framework.

ScoutNinja

ScoutNinja is an Online Placement Portal,which provides placement opportunities to every deserving student who met the eligibility criteria based on the company requirements and also to make the placement process easy to everyone.From this I learnt how to build web application using Spring Boot framework.

EDUCATION

B.Tech in Computer Science ,KL University
📅 2019 - 2023   📍 vaddeswaram,AP

Computer Science Engineering CGPA - 9.31/10

Intermediate
Sarada junior College
📅 2017- 2019   📍 Vijayawada,AP

Board - 9.88/10

School
Sri Gowtham High School
📅 Vijayawada,AP   📍 SSC-9.2/10

SIGNIFICANT ROLES

Peer Mentor

I am a Student Peer Mentor in our University.

NSS Volunteer

I have participated in various NSS activities conducted by our university to help the people in villages.

SKILLS

- Languages:
  C, Java, C++, Python, R Programming
- Operating System:
  Windows family.
- Web Technologies:
  HTML, CSS3, Java Script, Django, Flask, Spring Boot, React, LifeRay
- IDE:
  Eclipse IDE, Visual Studio, PyCharm.
- DataBases:
  MySql, Oracle, PostgreSQL, Mongo DB

EXPERIENCE

Full Stack Developer
KPMG
📅 Jan 2023 – Ongoing

- React Front end development
- Liferay Full Stack Developer
- Working on Government Projects of India (YSR AarogyaSri, DEA.)
